

Employment opportunity at Metabolix Oilseeds, Inc.

Research Associate

Metabolix Oilseeds, Inc., a Canadian subsidiary of Yield10 Bioscience, Inc., is focused on the development of technologies to produce step-change improvements in yield of major oilseed crops to enhance global food security. We are seeking a highly motivated individual keen in applied plant biology research projects to join our multidisciplinary research team as Research Associate. In this role, the individual will contribute to our genetic engineering projects. This opportunity is available in our facilities in Saskatoon, Saskatchewan, Canada.

Successful candidate will possess the following skill set:

- Degree in Biology, Plant Sciences, Horticulture or a related field
- Strong background in Plant Biology and Plant Tissue Culture
- Minimum of 1-3 years' experience in plant tissue culture, Canola or oilseed transformation, plant tissue dissection, new method development, media formulation and preparation, and microscopy
- High level of comfort with experiment documentation, analysis, and presentation, including communicating results in the form of tables and charts
- Prior experience in basic molecular biology techniques, including DNA extraction, PCR, plasmid purification, gel electrophoresis and maintenance of lab equipment
- Knowledge of scientific activities in a greenhouse
- Excellent oral and written communication skills and the ability to work in a fast-paced research environment both independently and in a team

Metabolix Oilseeds, Inc. is an equal opportunity employer offering excellent career opportunities as well as a competitive compensation and benefits package. Please forward resume with a cover letter and the contact names of three references to careers@yield10bio.com. No phone calls please. www.yield10bio.com.
